Agenda

- ▶ Intro
 - ▶ BizFirstAi.com
 - ▶ Elastic Search
- ▶ Tech Trends
 - ▶ Agentic Workflow
 - ▶ Observability
 - ▶ Vector Database
- ▶ Workflows
 - ▶ Order workflow
 - ▶ BizFirst Flow Studio
- ▶ Elastic Search Integration
- ▶ AI Agents

About BizFirst

- ▶ AI Orchestration
- ▶ Enterprise Integration Platform
- ▶ Create workflows
- ▶ Ai workflows
- ▶ Non-ai workflows

Services

- ▶ Custom Application Development
 - ▶ AI
 - ▶ Elastic Search
 - ▶ Specialized Engineers
 - ▶ Austin / Offshore Based Engineers
- ▶ Implement AI solutions
 - ▶ Discounted Servers
 - ▶ Discounted Credits
 - ▶ Ads on communities

BizFirst AI Stack

BUILD UI APP

Atlas Forms

Build enterprise forms with 89+ controls, no code

Edge Interact

Orchestrate dynamic UI with a plugin-based architecture

Edge Stream

Real-time message pipeline at 10,000+ msg/sec

ORCHESTRATE AI

Flow

Visual workflow automation — replace n8n

Octopus

AI orchestration engine — replace LangChain

ANCP

Agent communication protocol — replace Google A2A

BizFirst Observe

AI-native observability with zero lock-in

SECURE

Passport

Enterprise cybersecurity, IAM & SSO

OperateAi

Blockchain-grade trust for enterprise operations

LAUNCH SAAS

MarketHub

Launch your own marketplace, community & certifications

Install Hub

Enterprise package management & distribution

DATA

Data Ocean

605+ table data platform — free to start

Quick Review

Elastic Search

- Best-in-class search platform
- Enterprise Search across systems
- Handles unstructured data Vector database support for AI/semantic
- search Near real-time
- scalable, distributed architecture

elastic

Technology Trends

Ai Agents

Agents

- TOOLS
- TROUBLESHOOTING
- COST

LLM

- Smaller
- Getting Better
- Infra cost is lowering

Rag

- Cost
- Every organization
- **Elastic Search**

Workflow Automation

Infrastructure

- Create elastic search servers
- Maintain elastic search servers

Data

- Move data between servers
- Backup or archive data
- Fetch and enhance or enrich data

Business

- Participate in business workflow
- Classify orders using ai
- Fraud check based on elastic search data
- Direct data operations vs api operations

Observability

<https://Observe.BizFirstAi.com>
<https://EdgeStream.BizFirstAi.com>

Ai

- SEE WHAT'S HAPPENING INSIDE AI AGENTS
- LOGS STORED IN ELASTIC SEARCH

Browser

- BROWSER ACTIVITIES LOGGED INTO **ELASTIC SEARCH**
- REMOTE USER DEBUGGING

Workflows
