The Hitchhiker's Guide to Observability

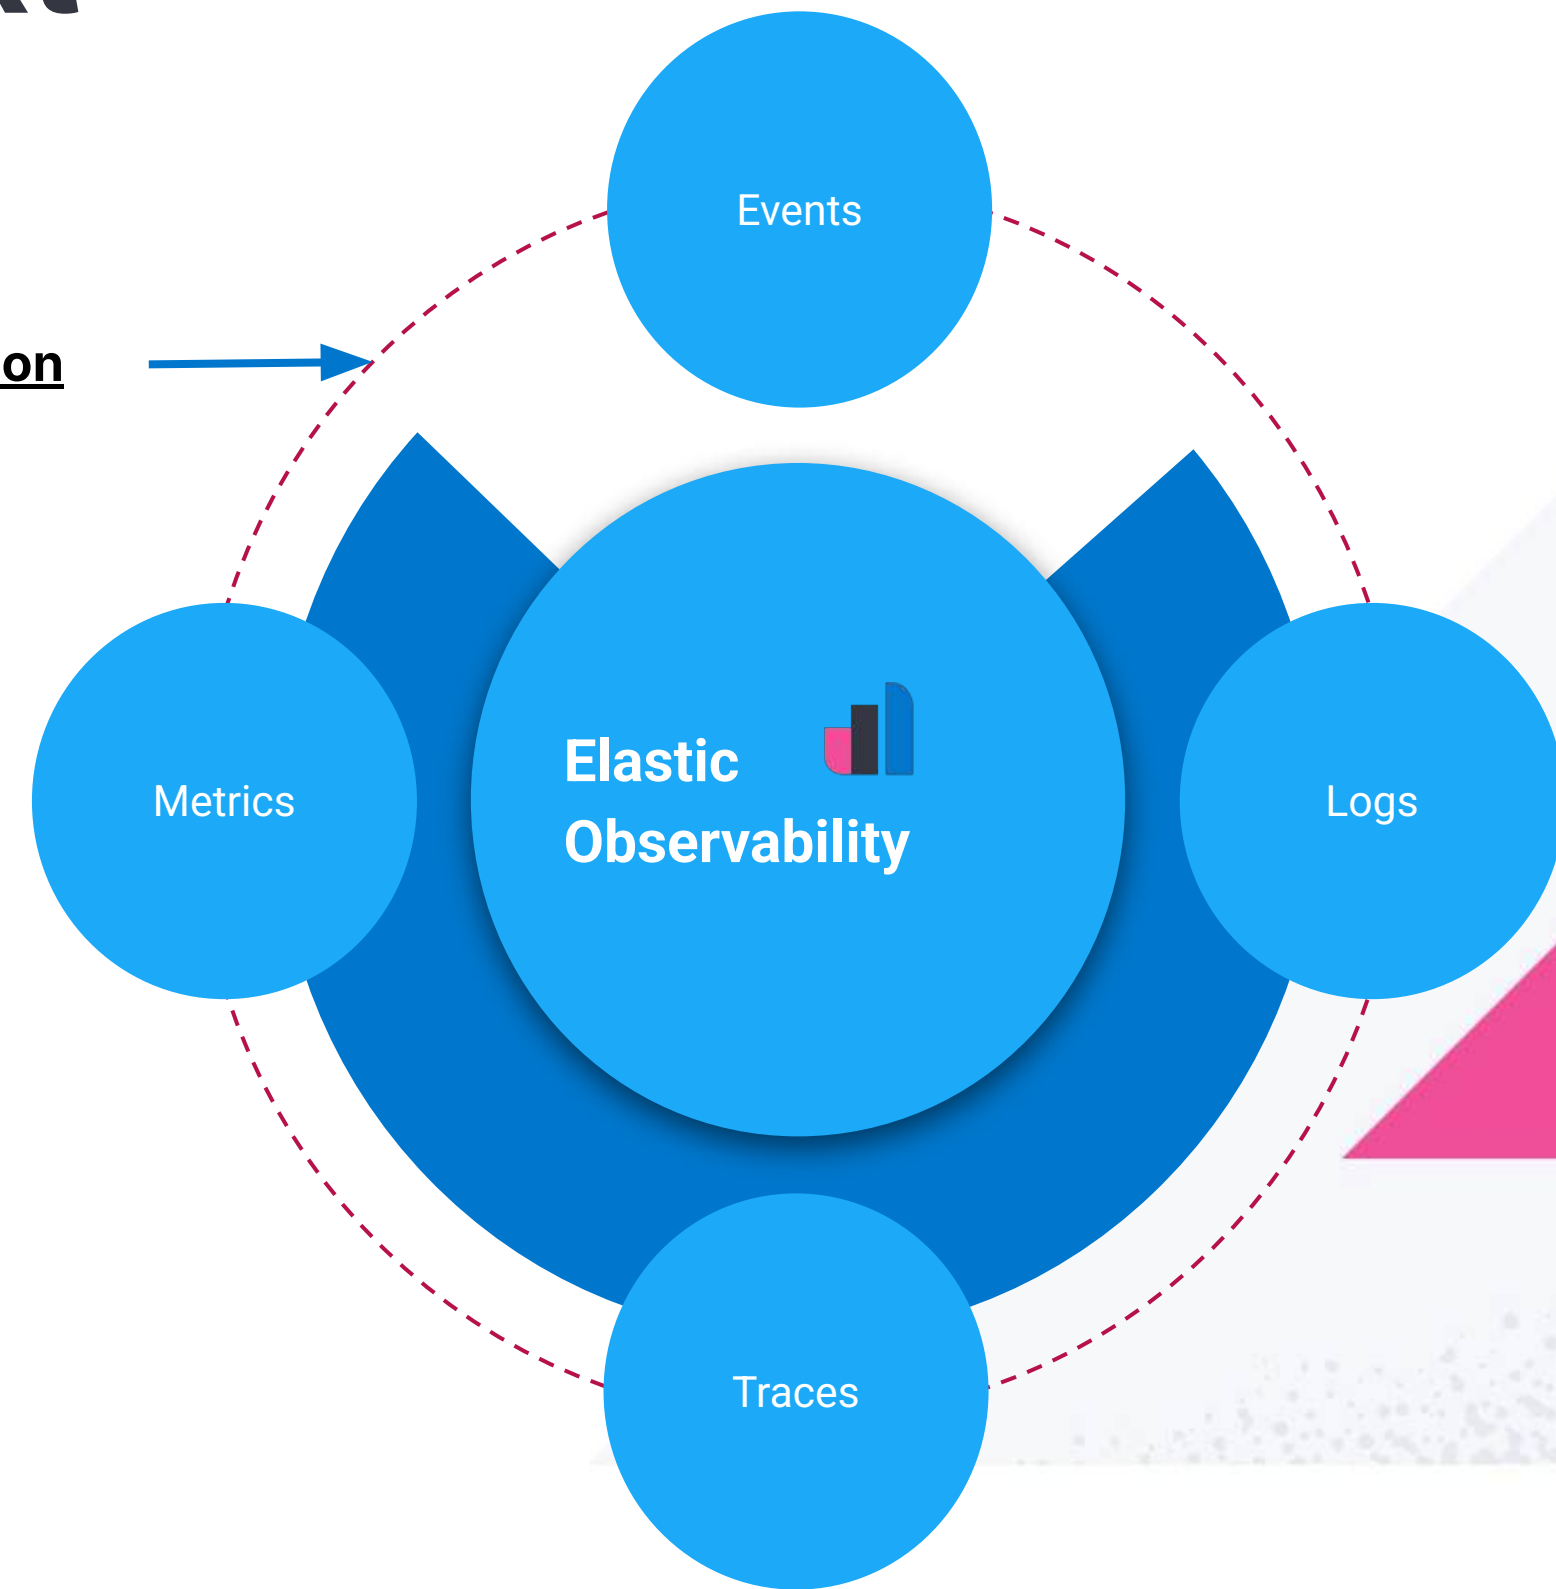

DON'T PANIC

MELT Framework + Context

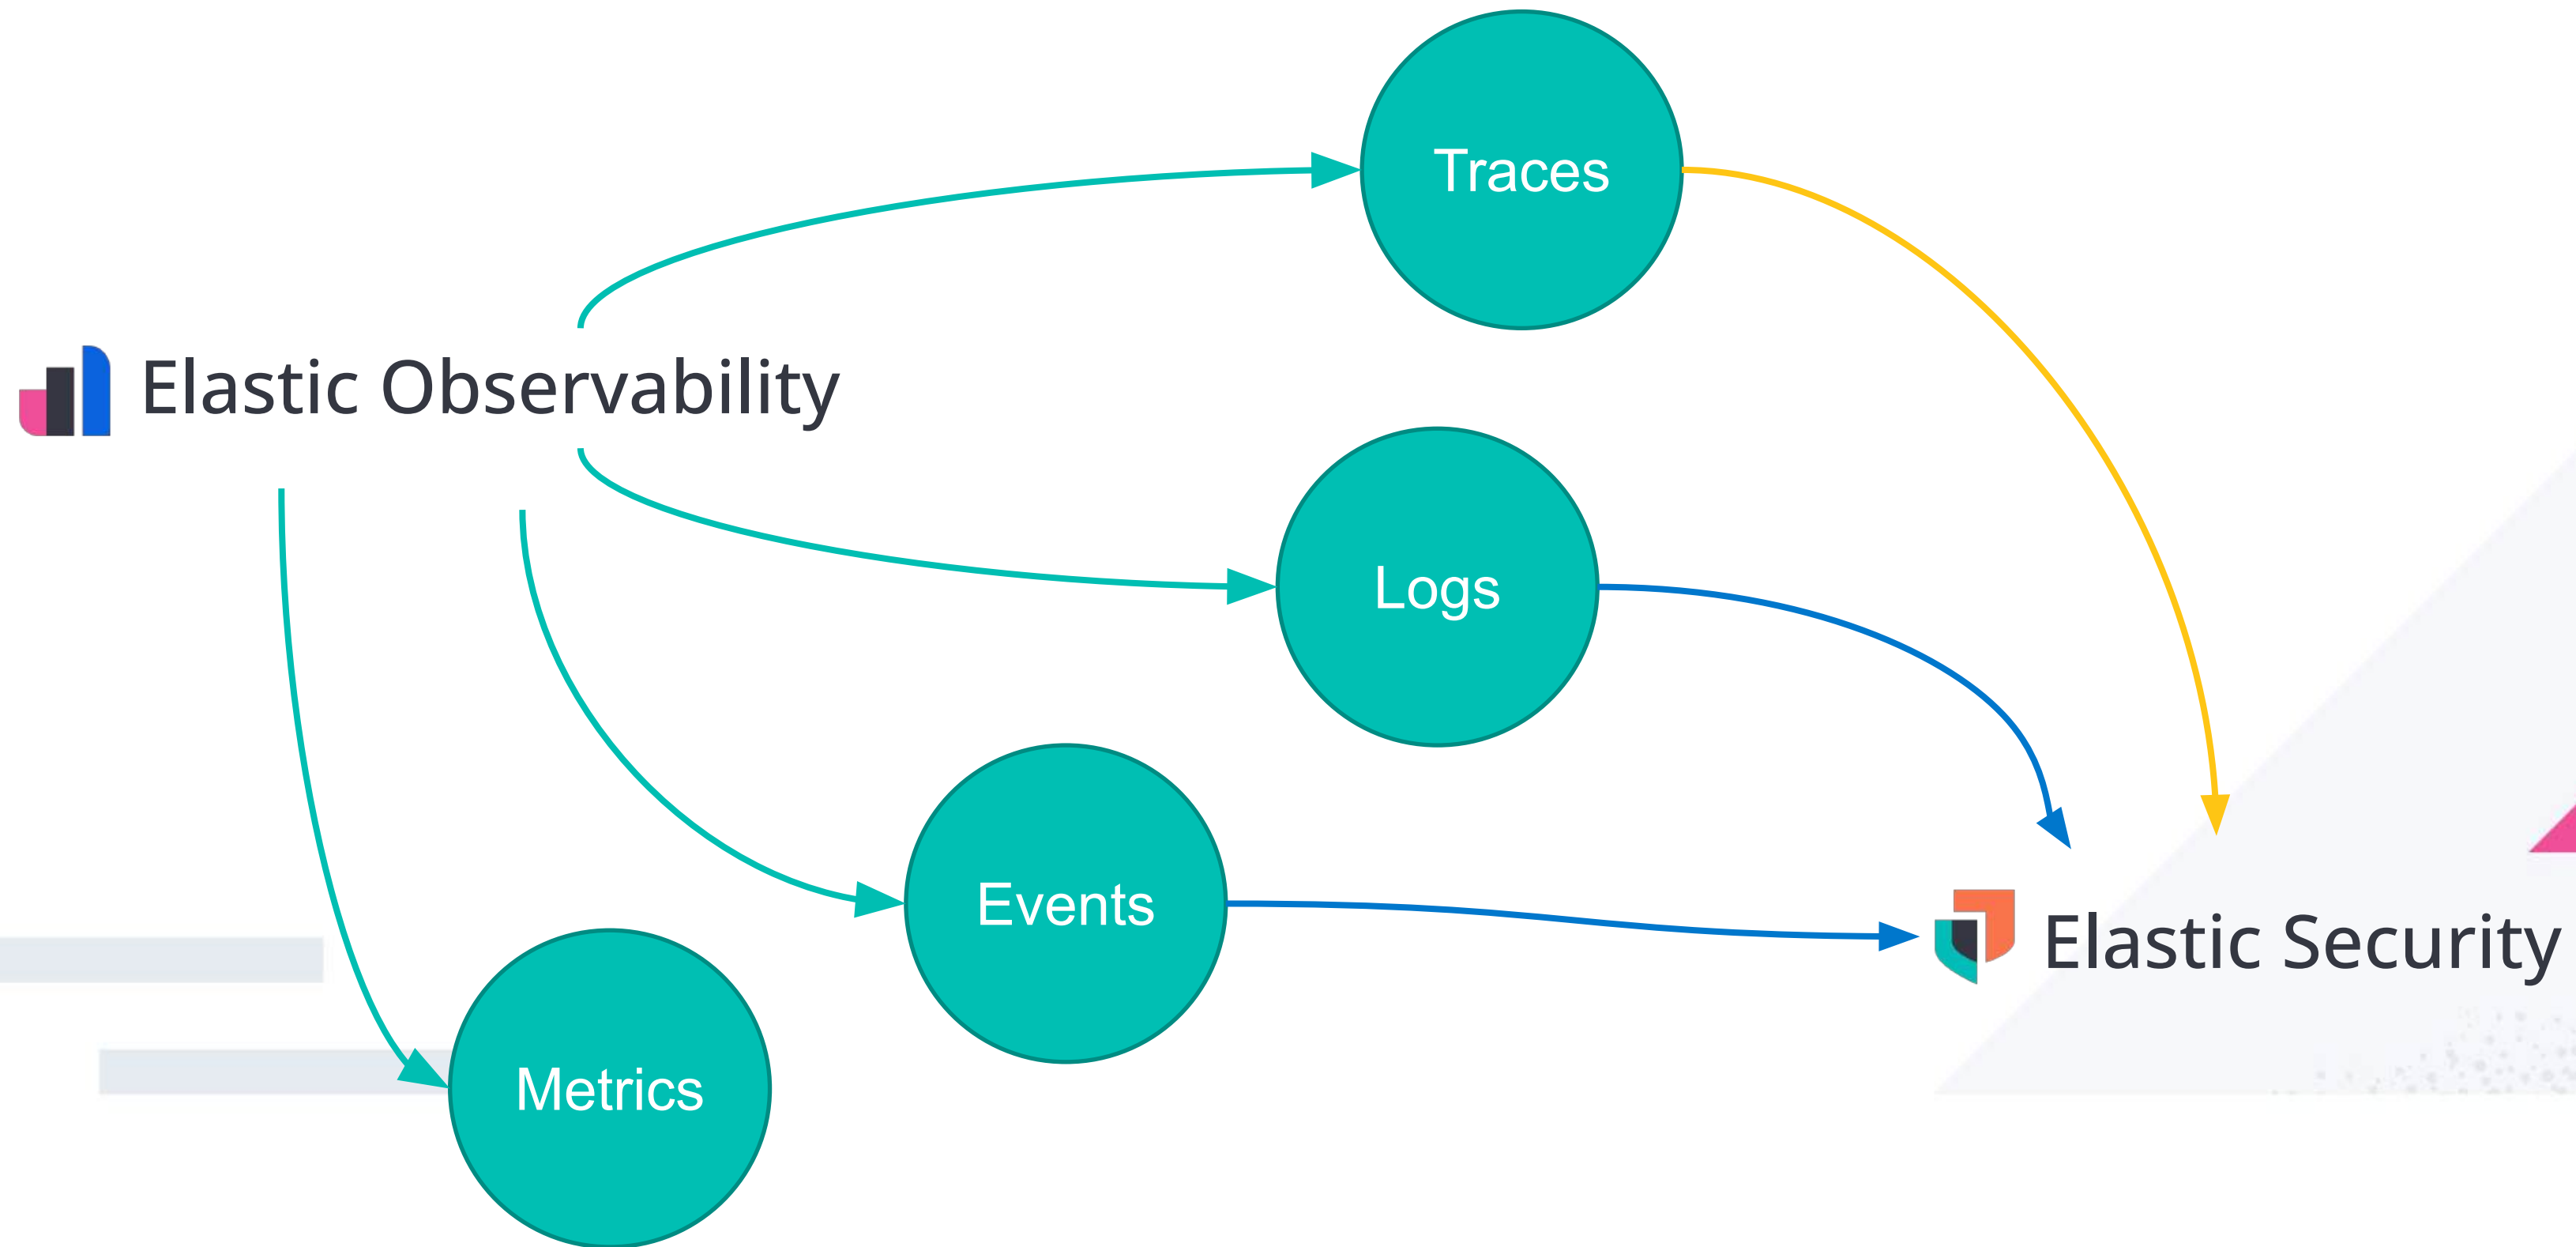

The missing piece context propagation

- Context helps correlate between Metrics, Logs, and Traces
- Use context information to reproduce issues locally and for RCA
- Distributed tracing made possible with context
- Identify the time spent in each service for a transaction or request
- Identify performance bottlenecks and optimization areas
- Error logging made simple for each transaction or request

MELT Framework + Security

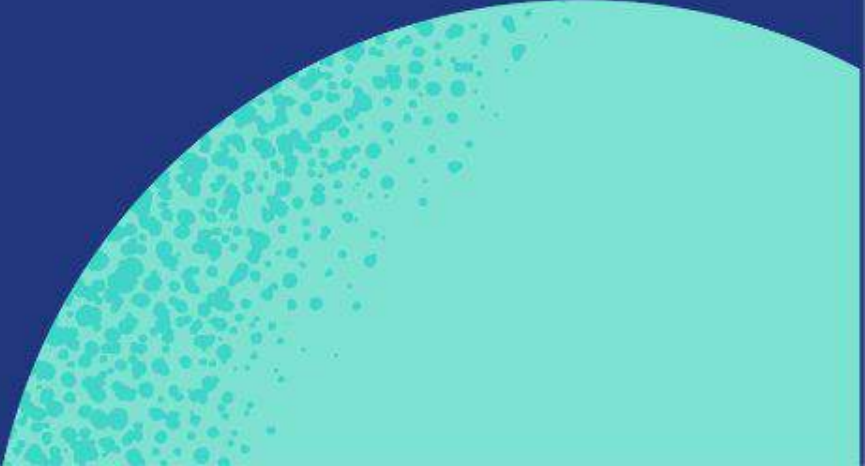

42

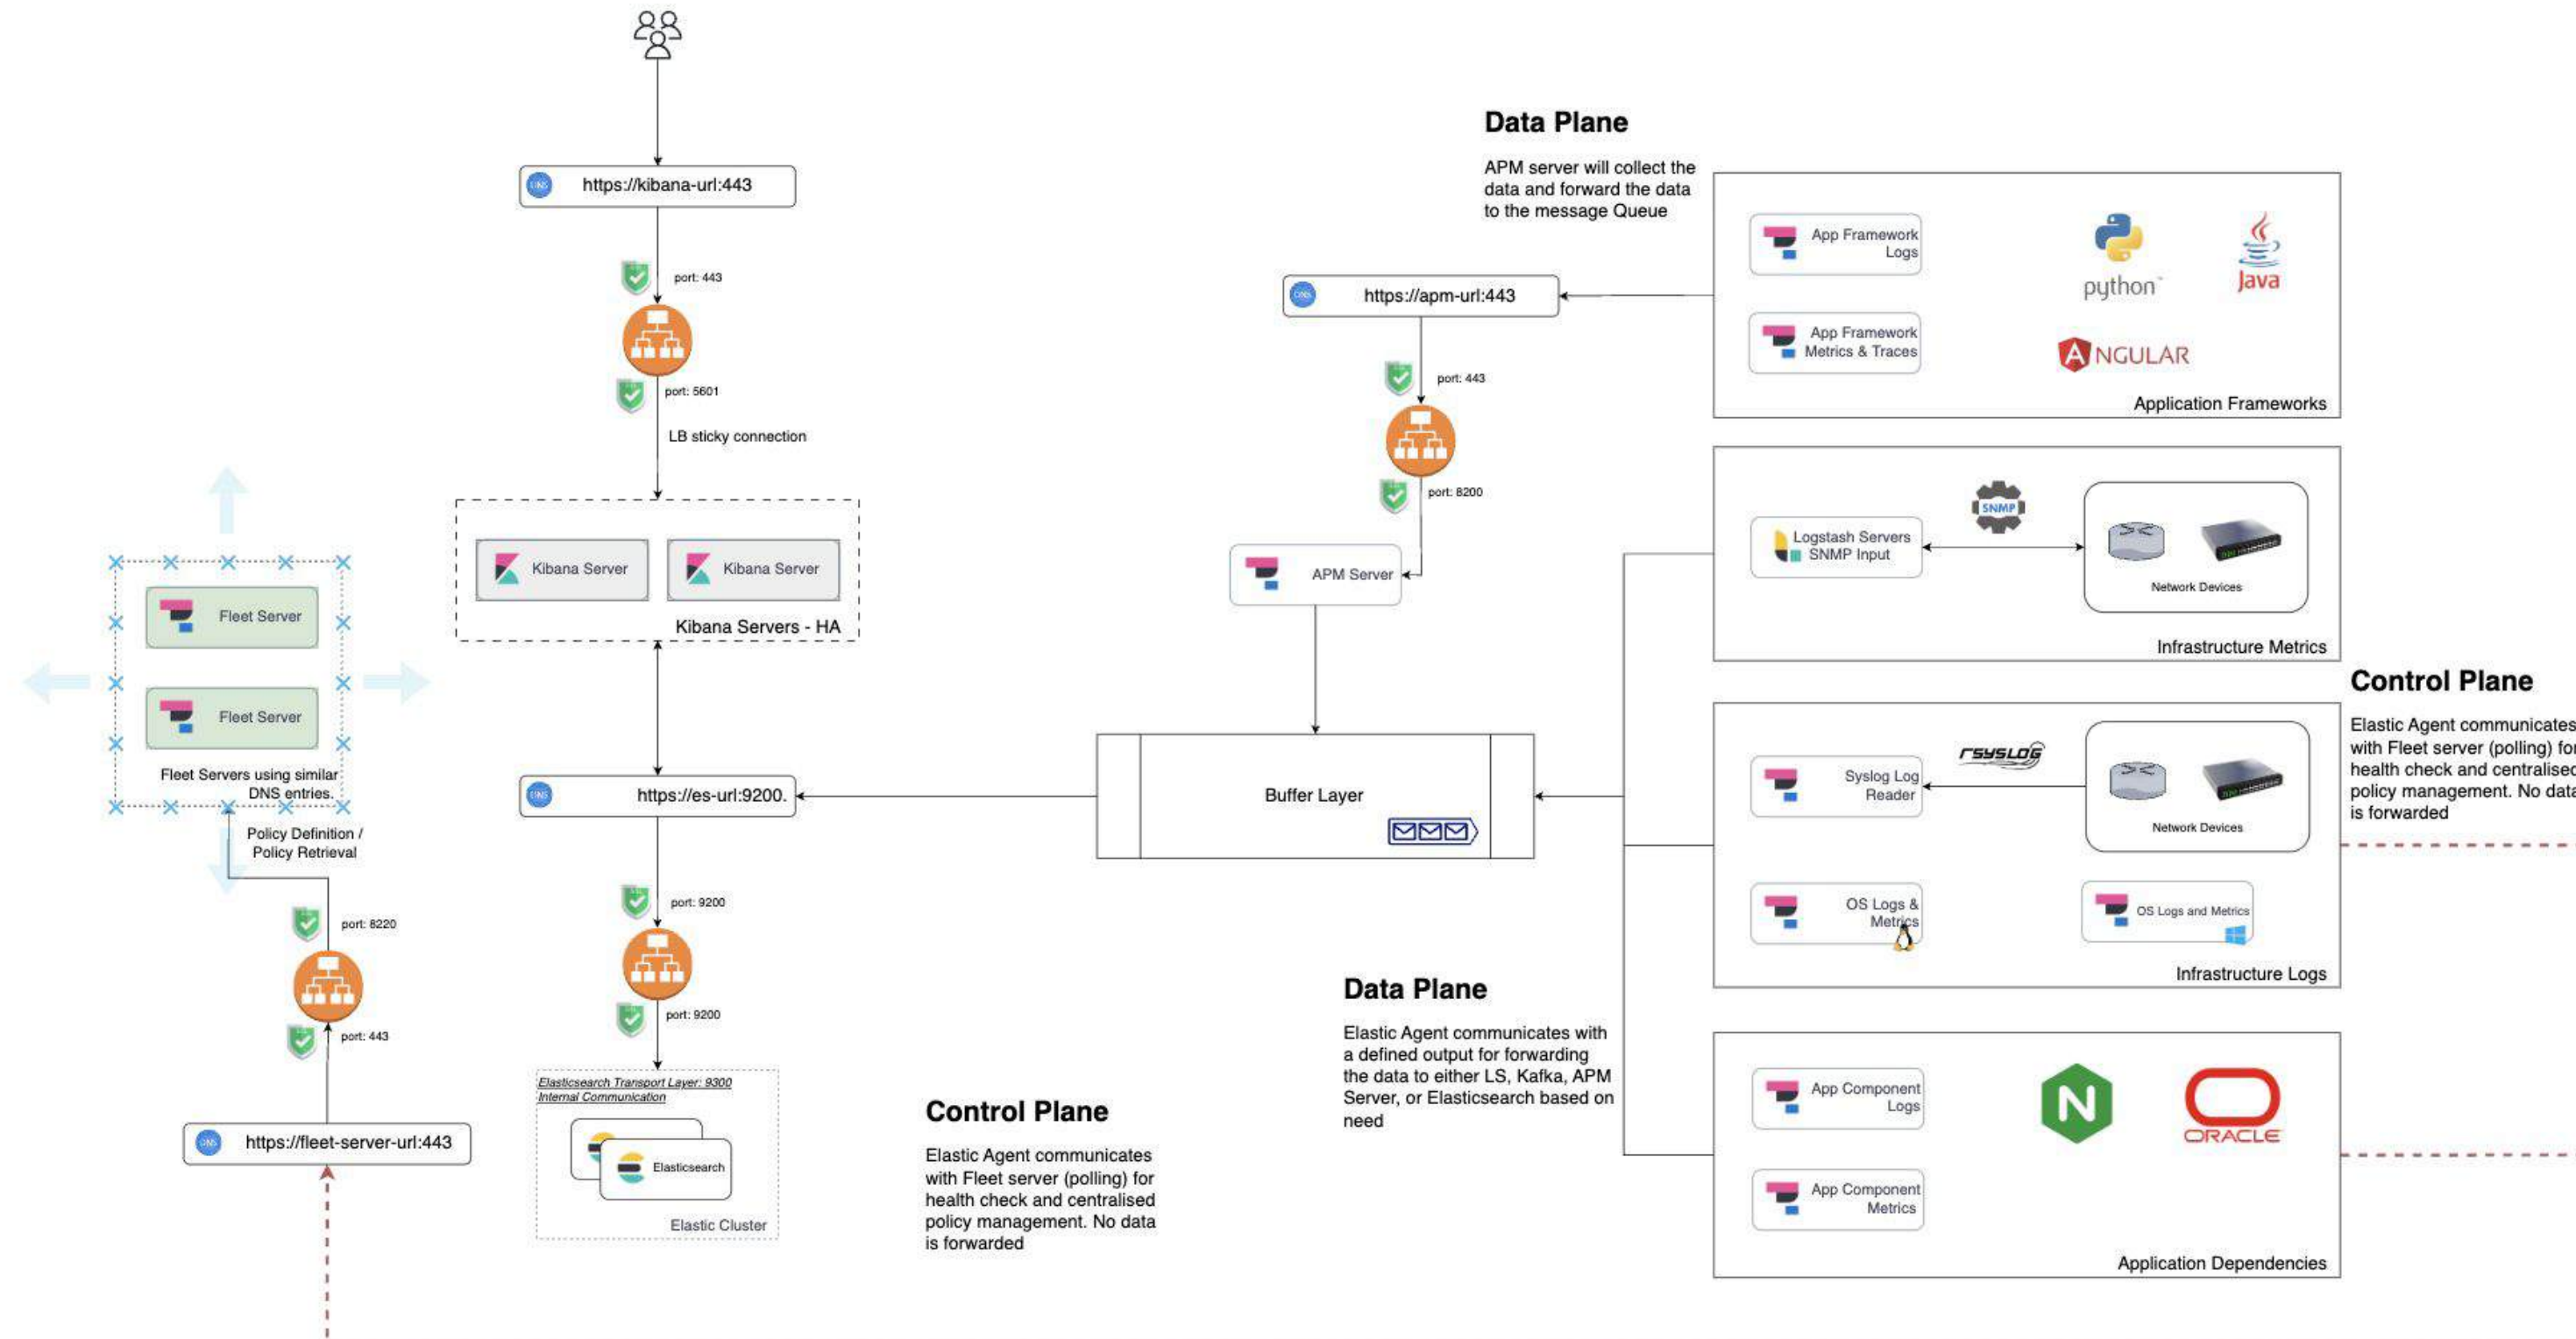

Enterprise Architecture

Bigger teams that don't like talking
to each other

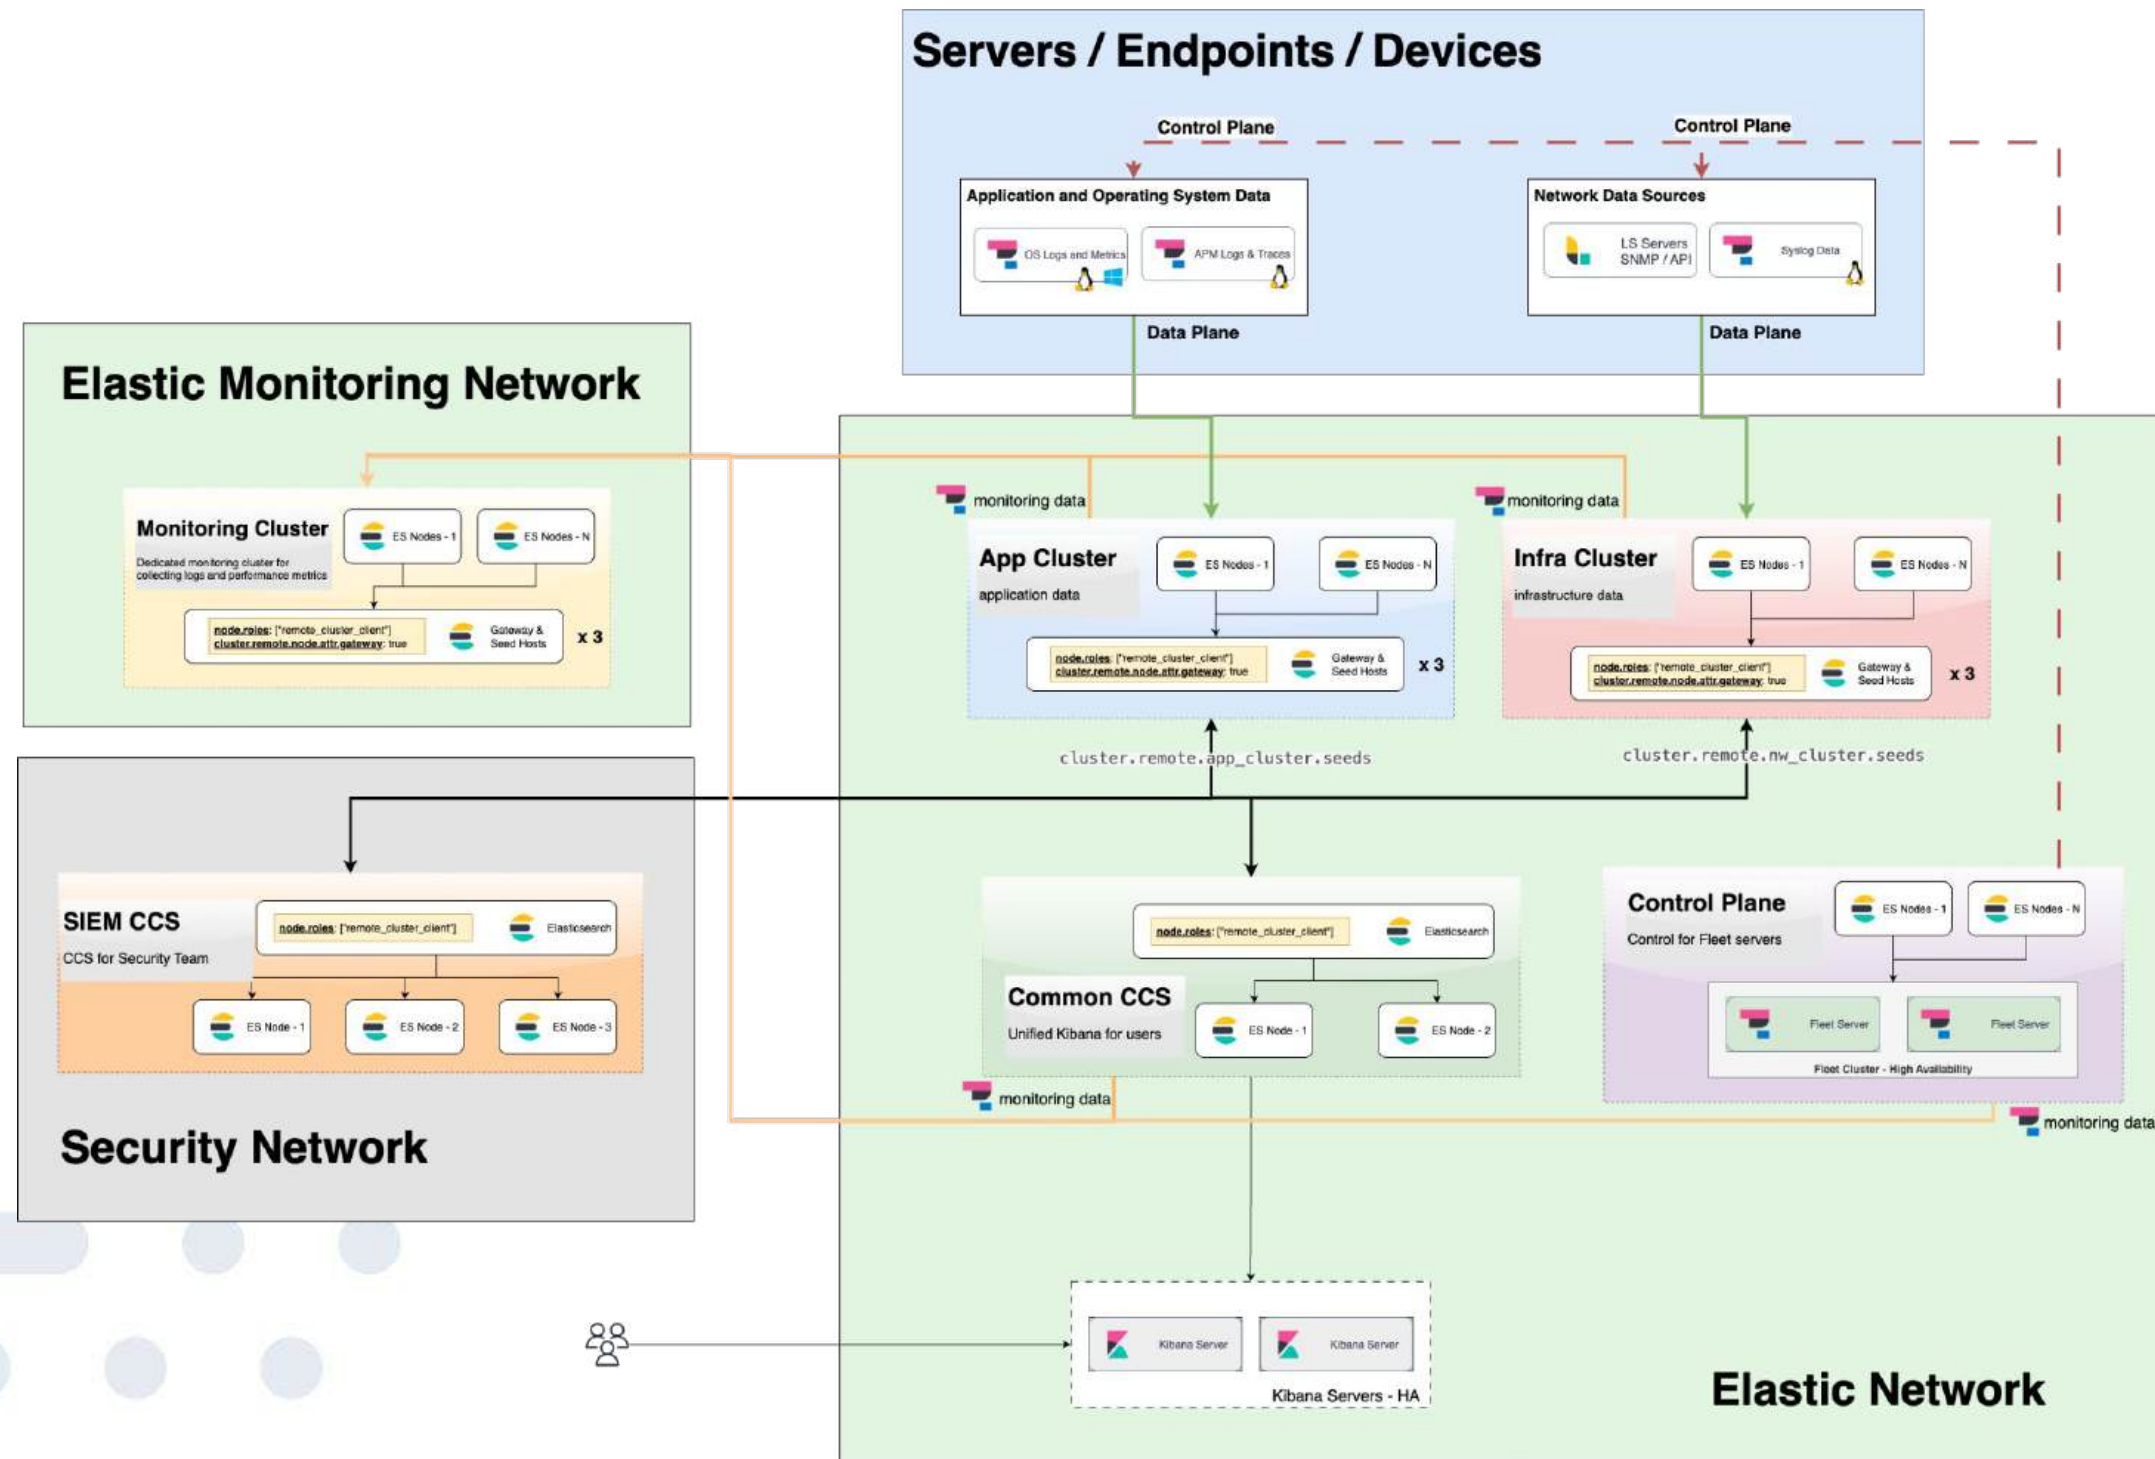

Enterprise Architecture

Data collection at scale

Enterprise Architecture

Optimise TCO

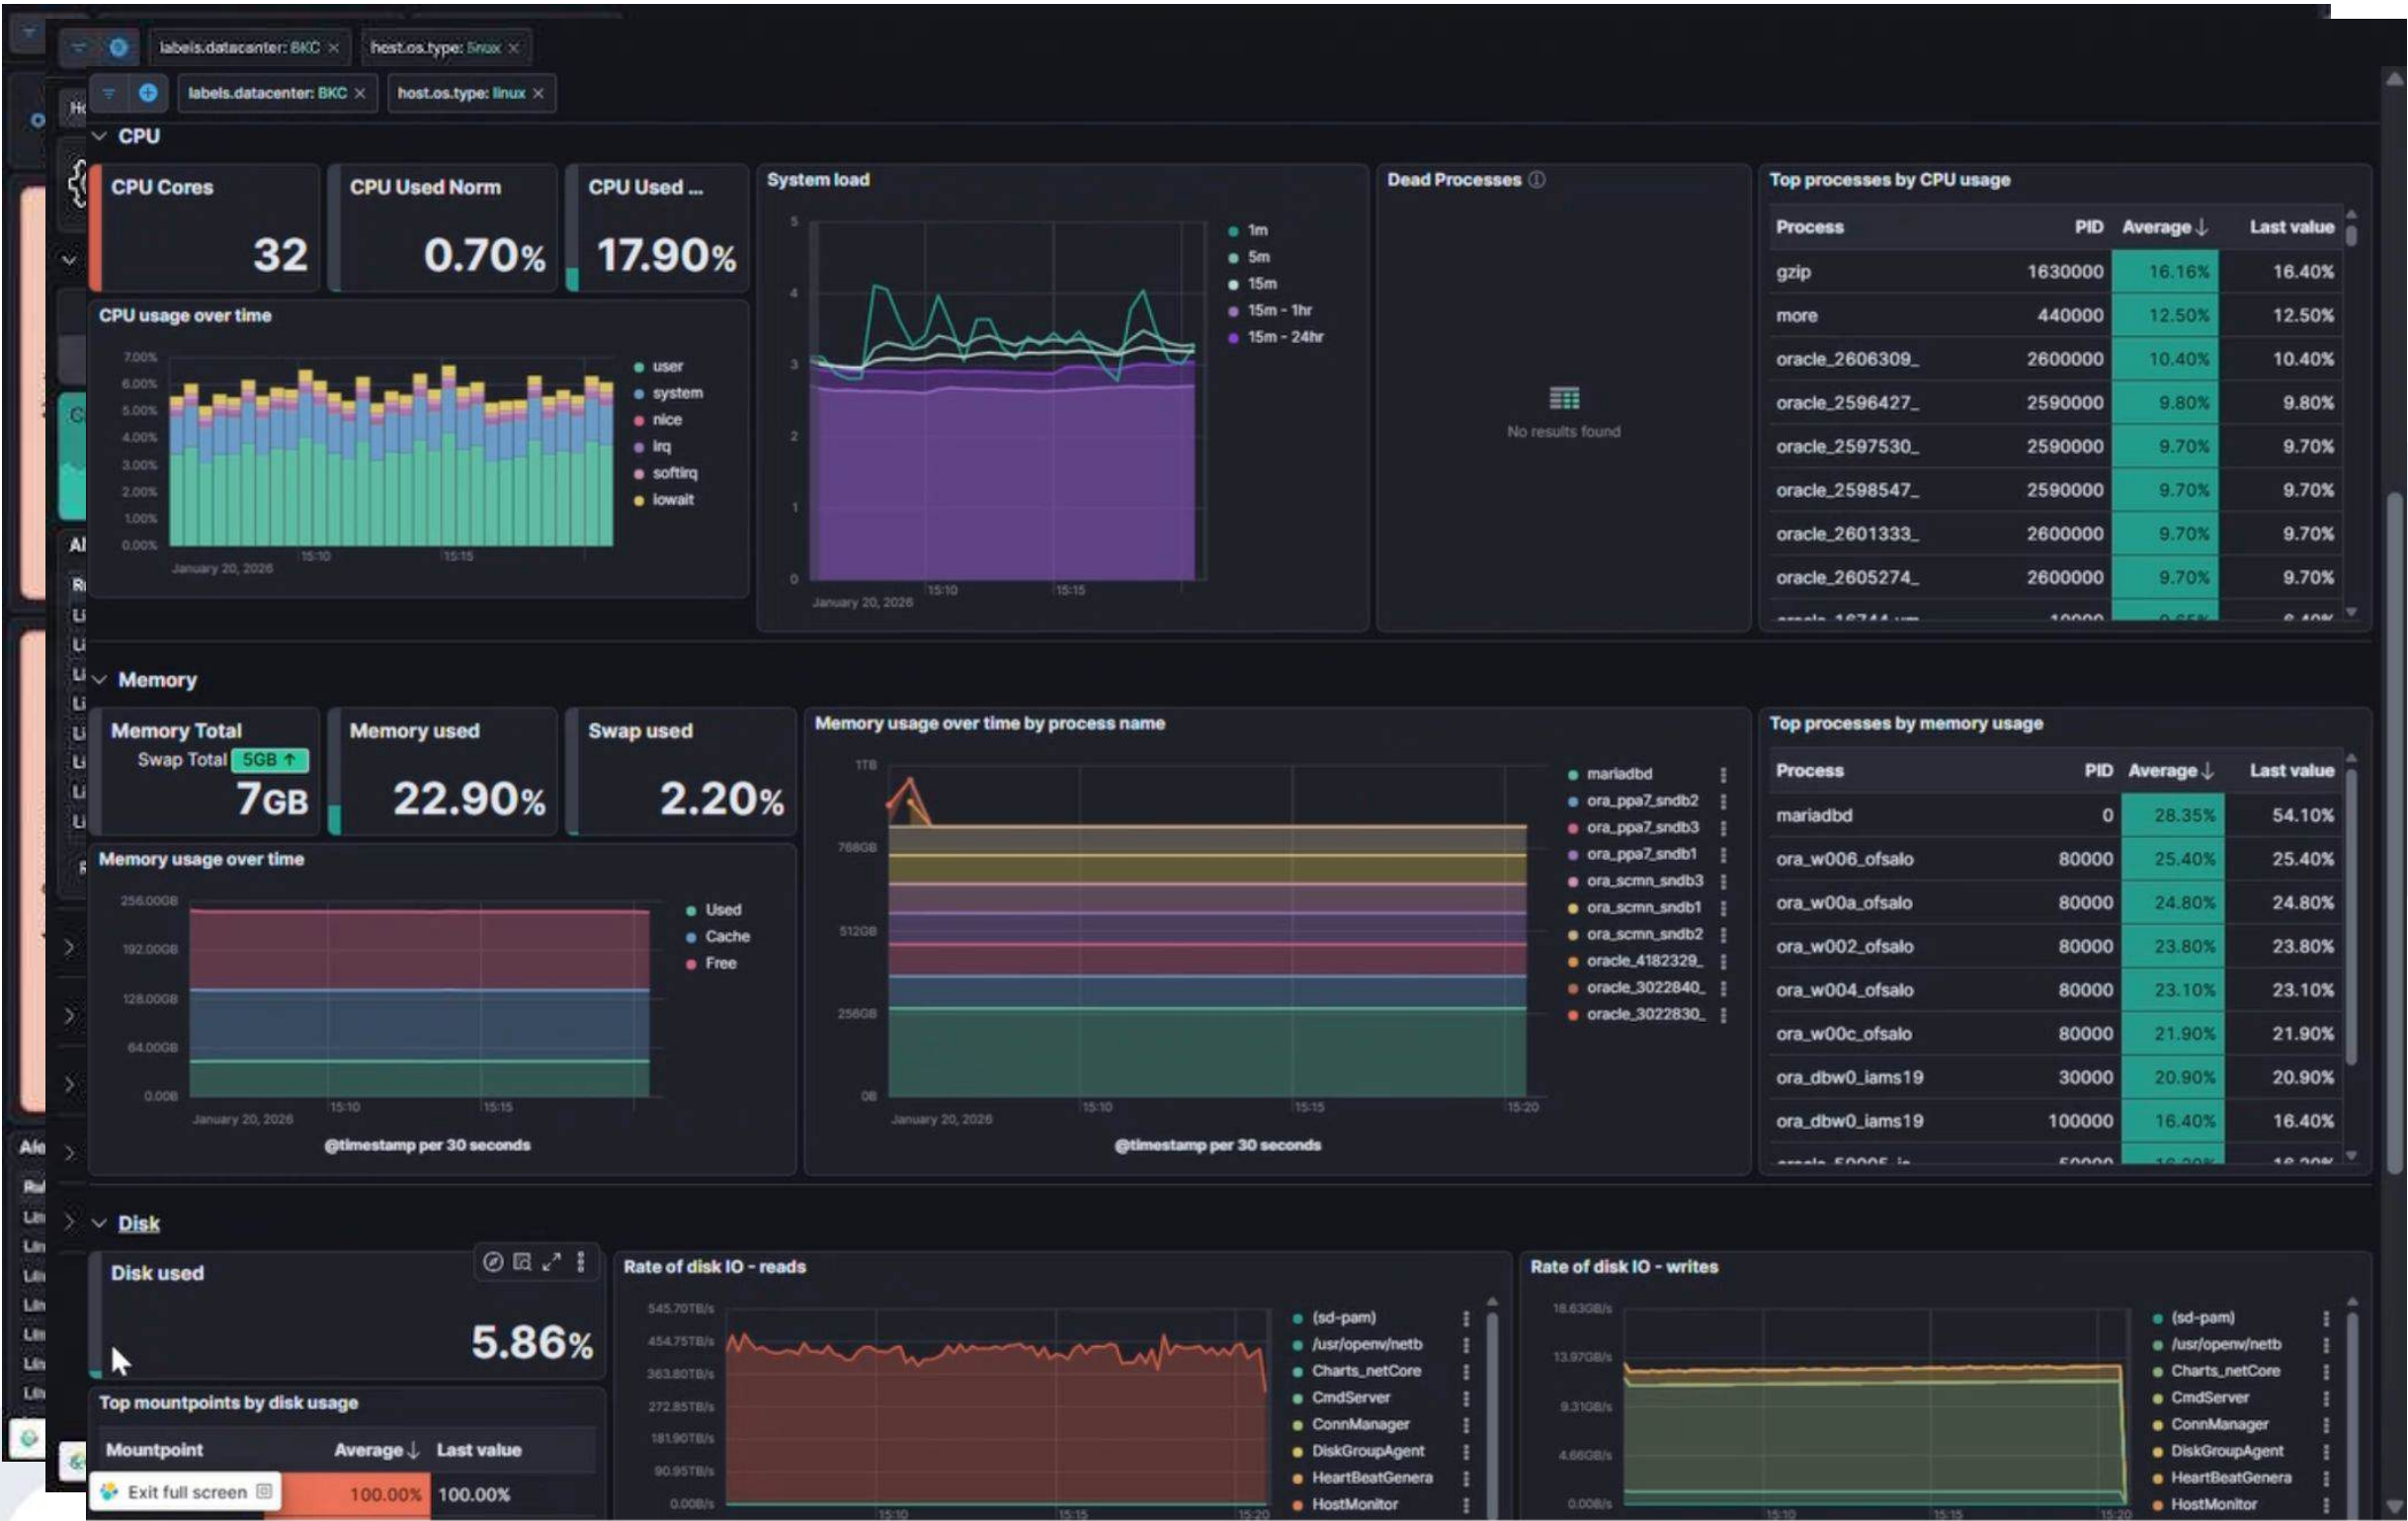

- Isolated Environments
- No duplication of data
- Security folks ♥ observability folks and vice versa

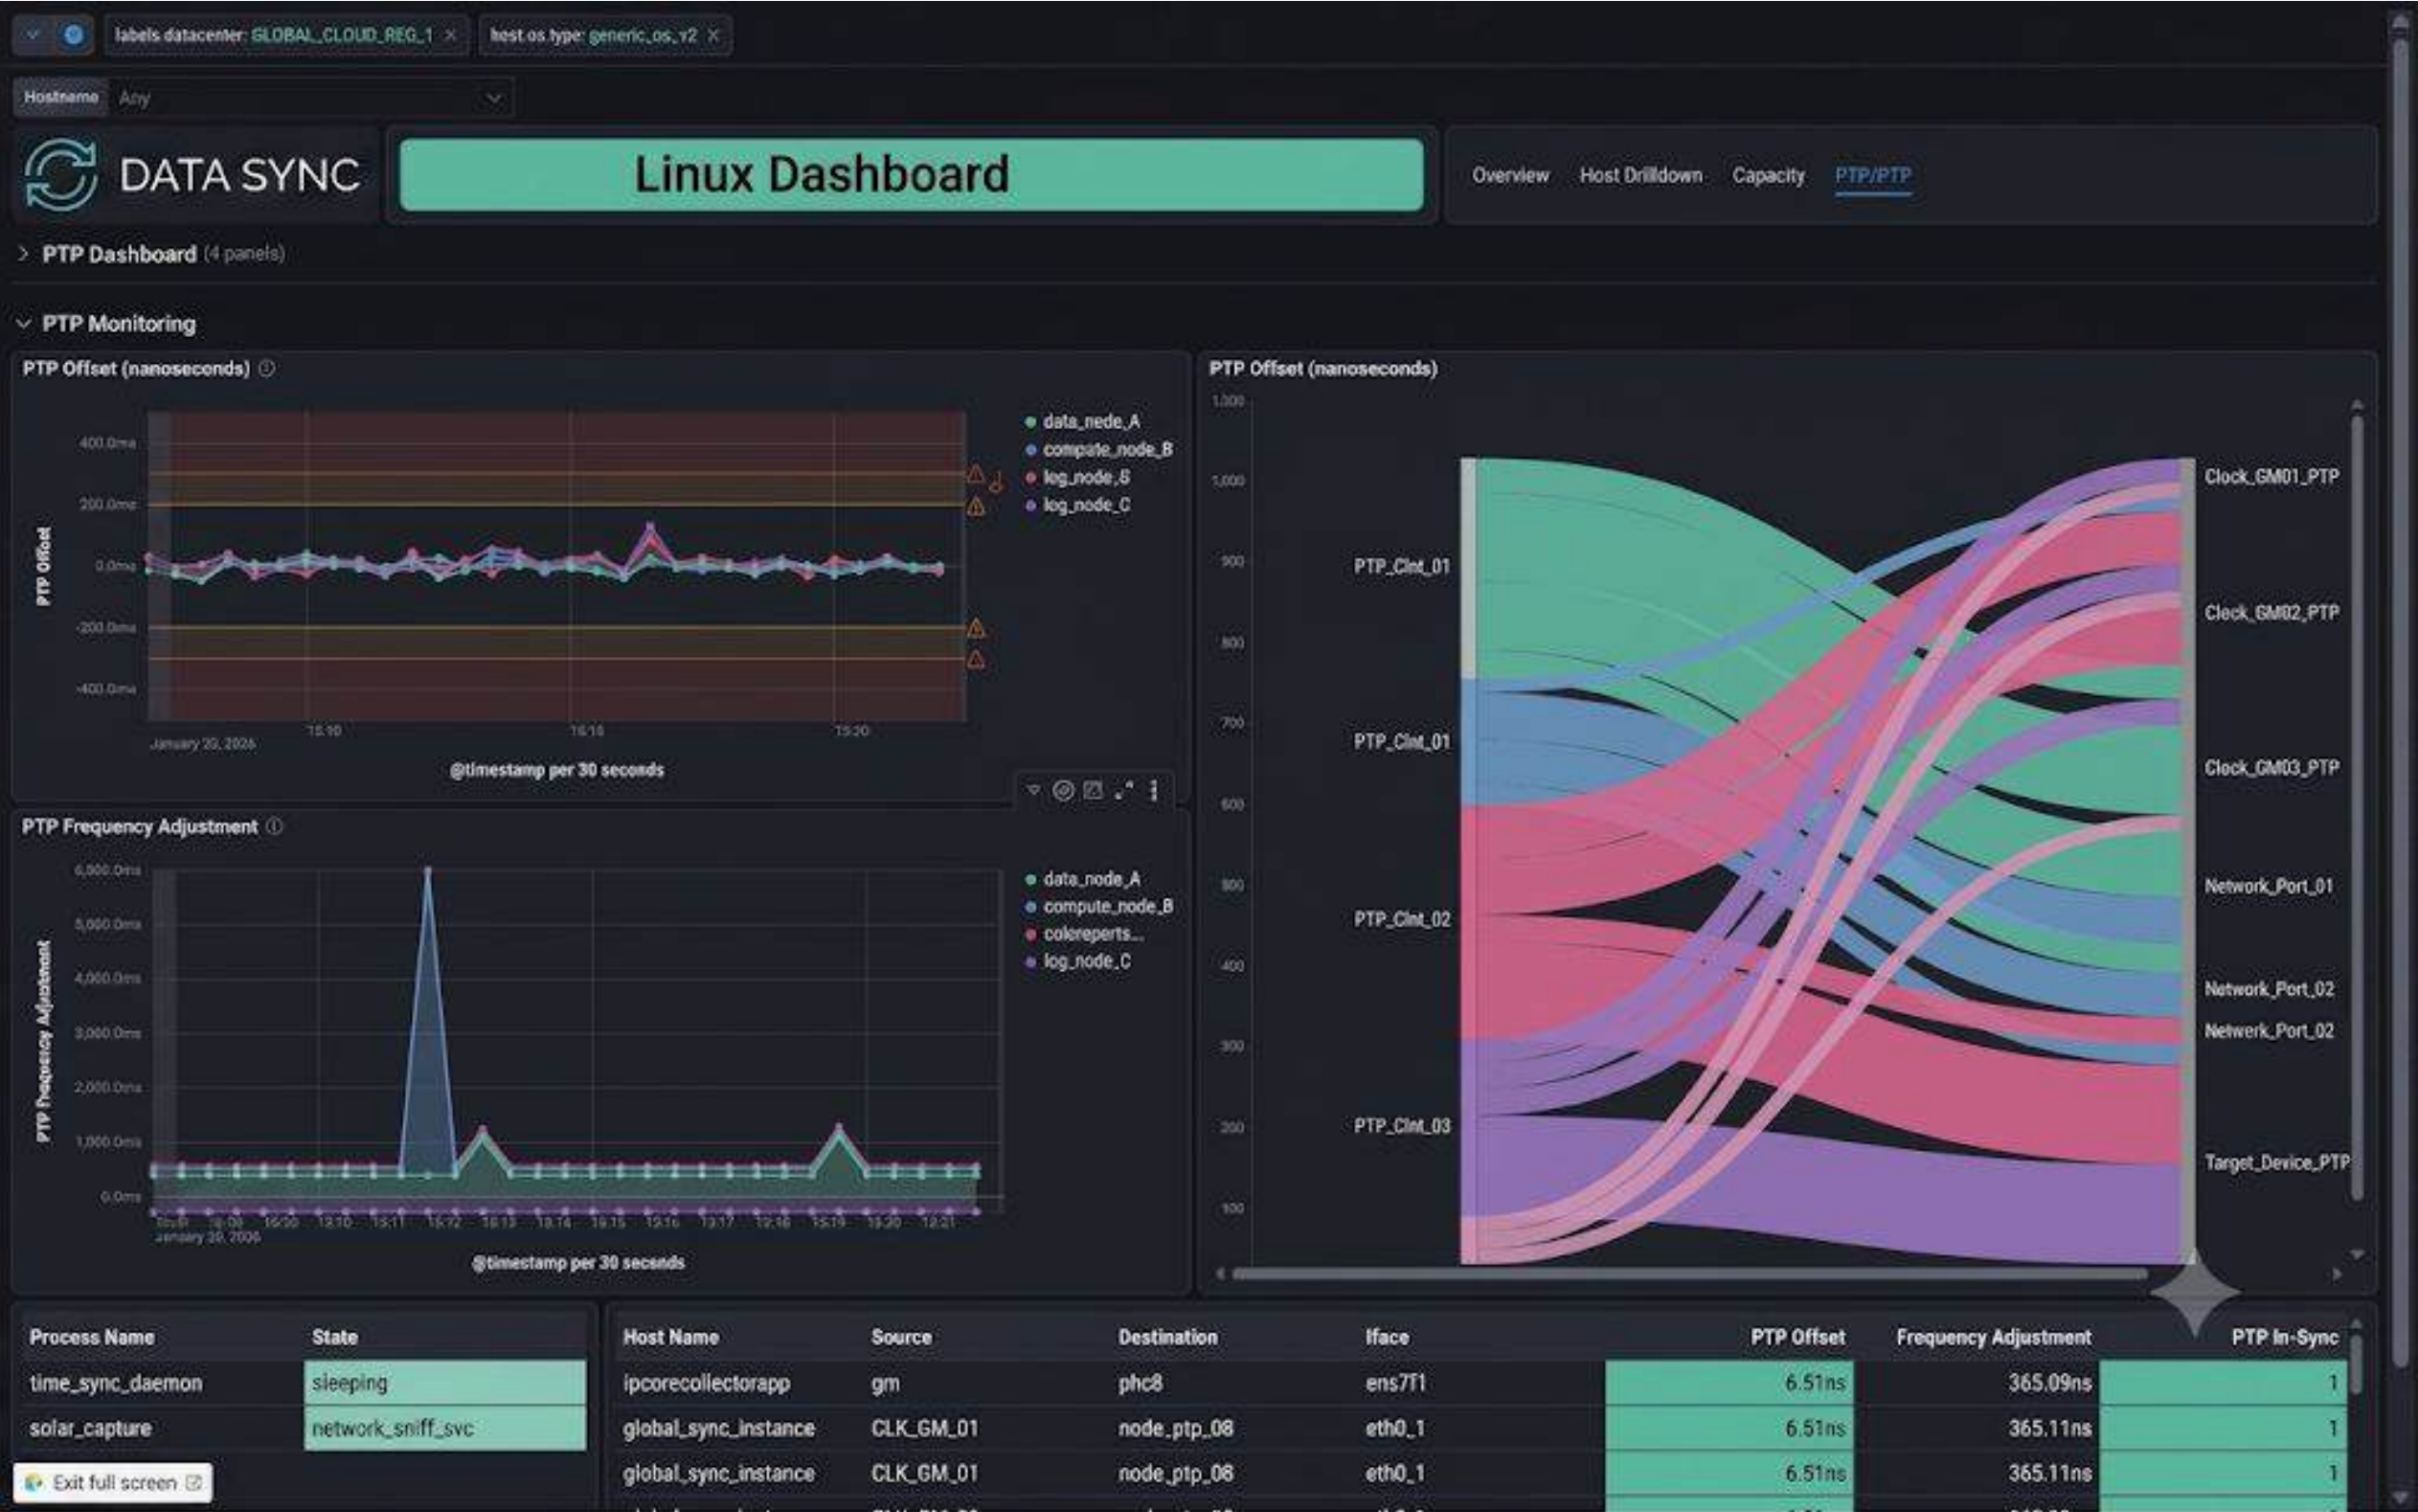

Life, the Universe and Everything

The art of the possible

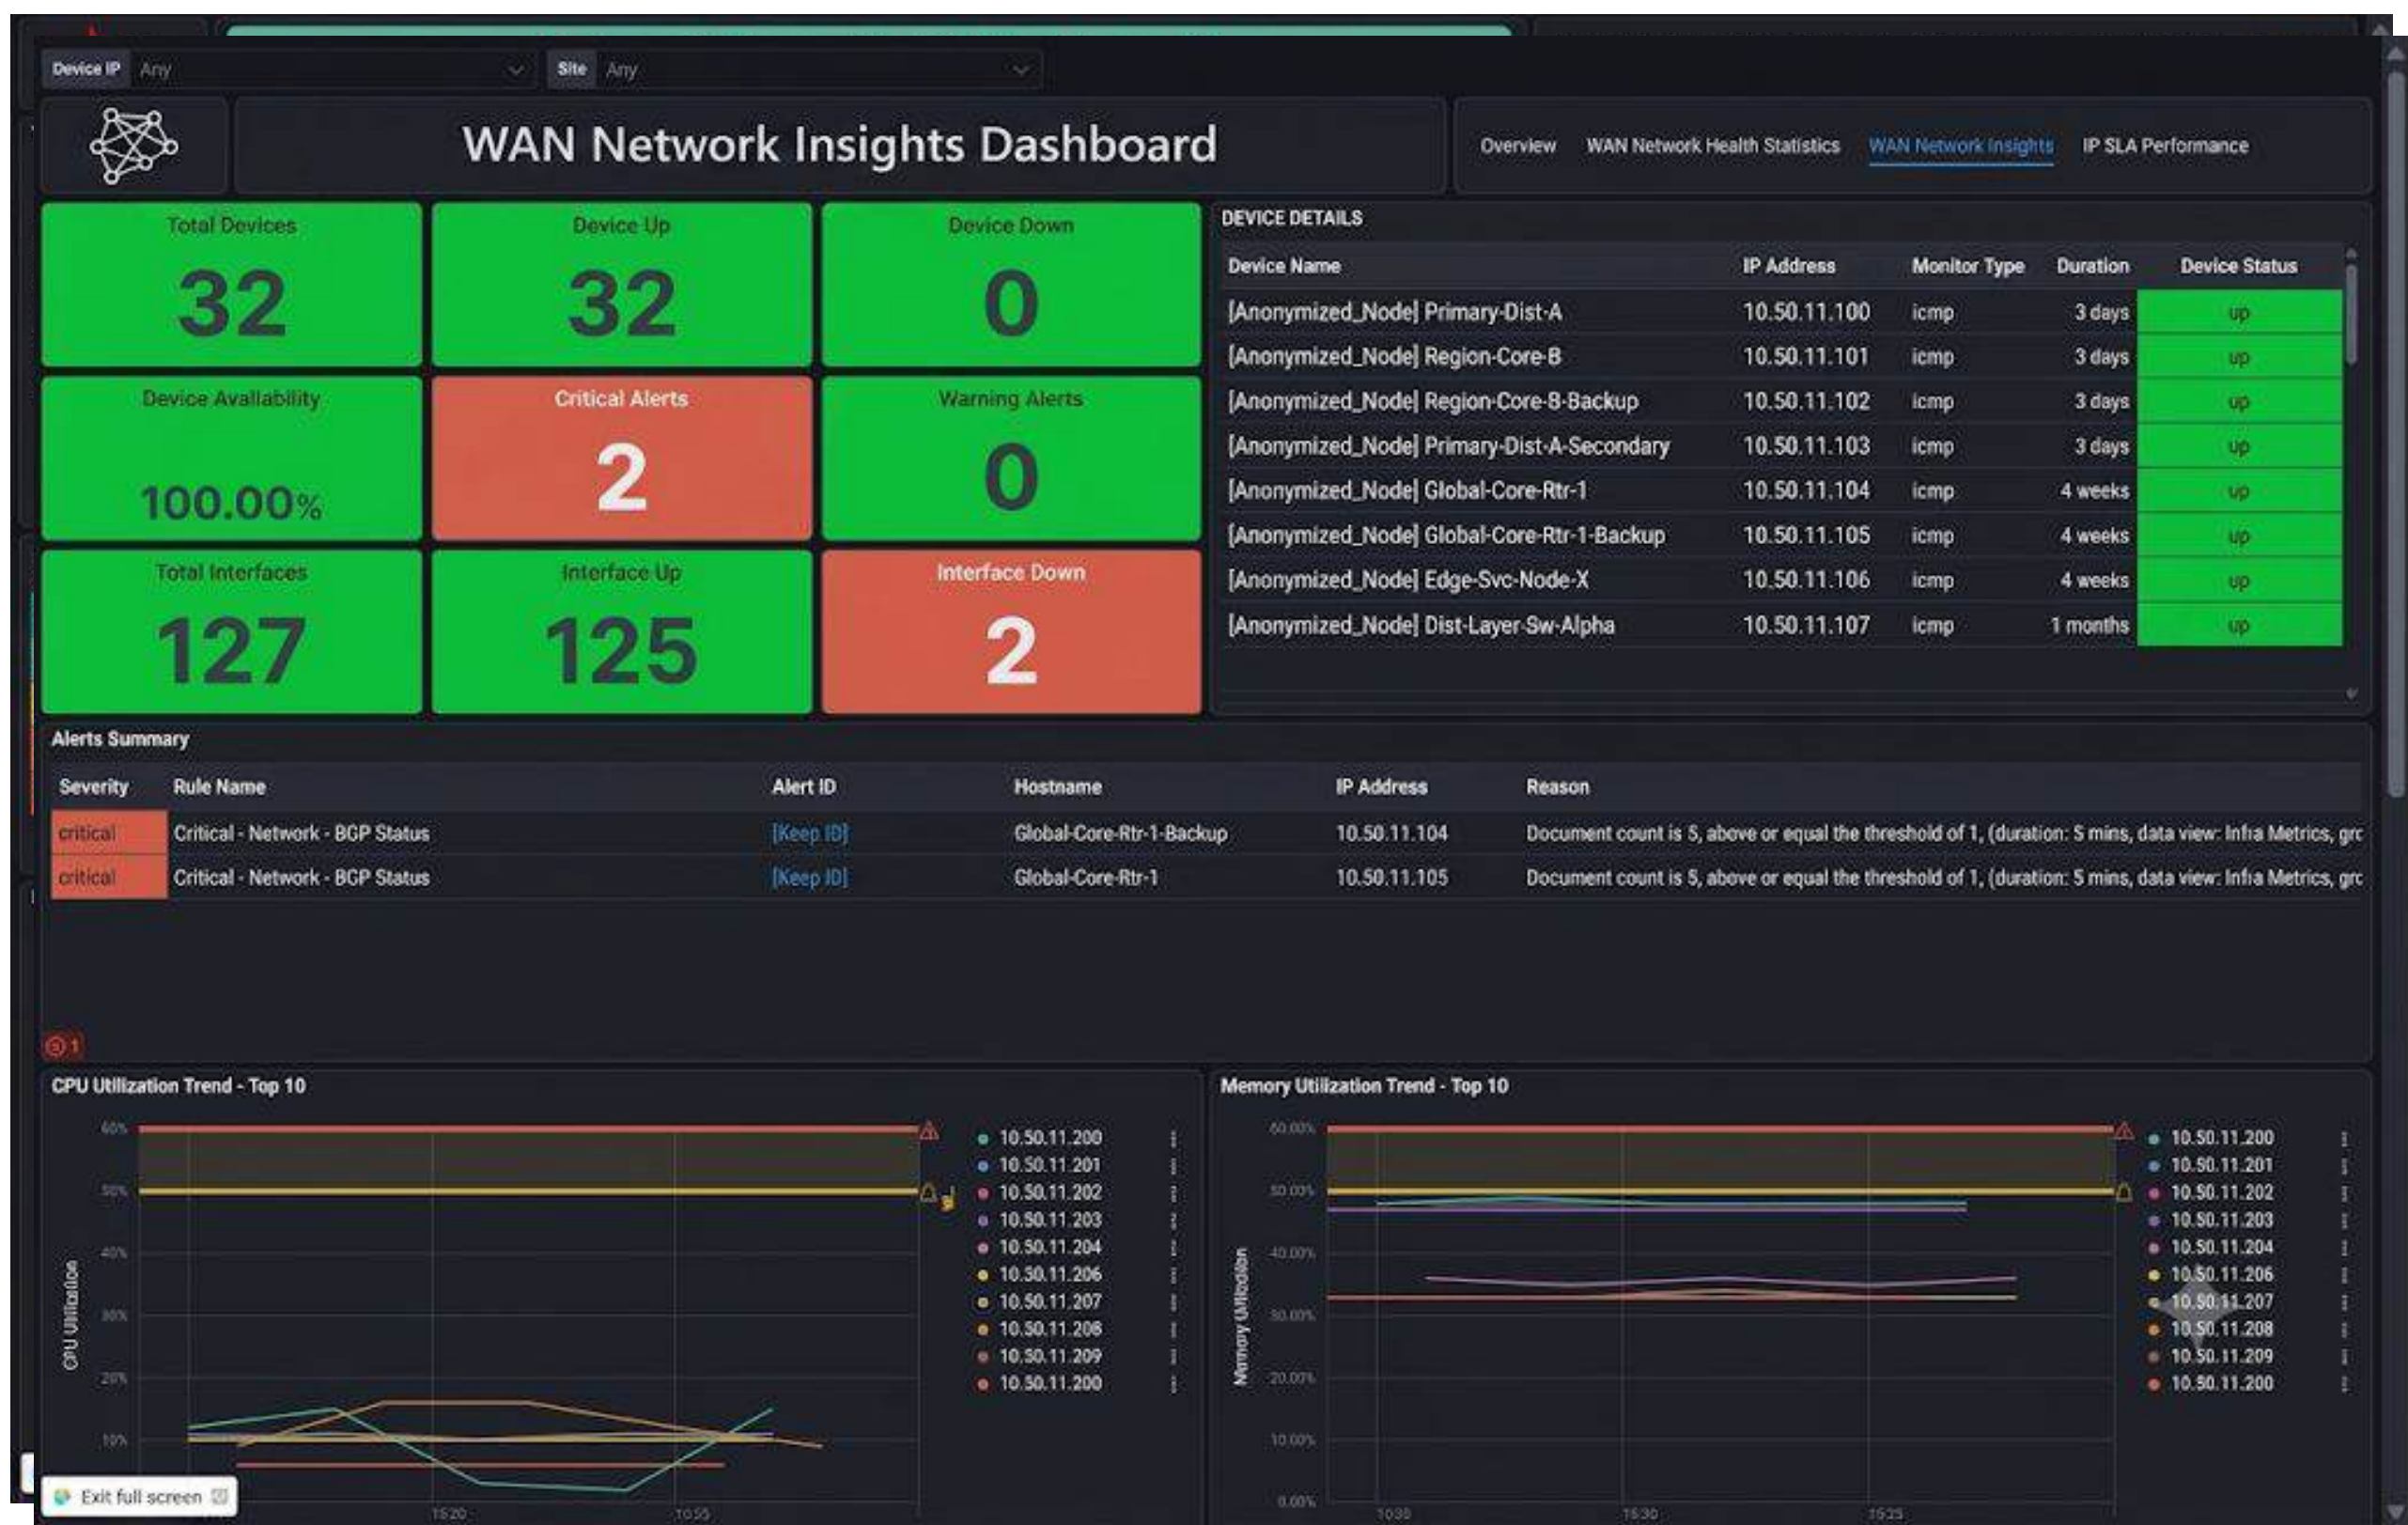

OS Monitoring

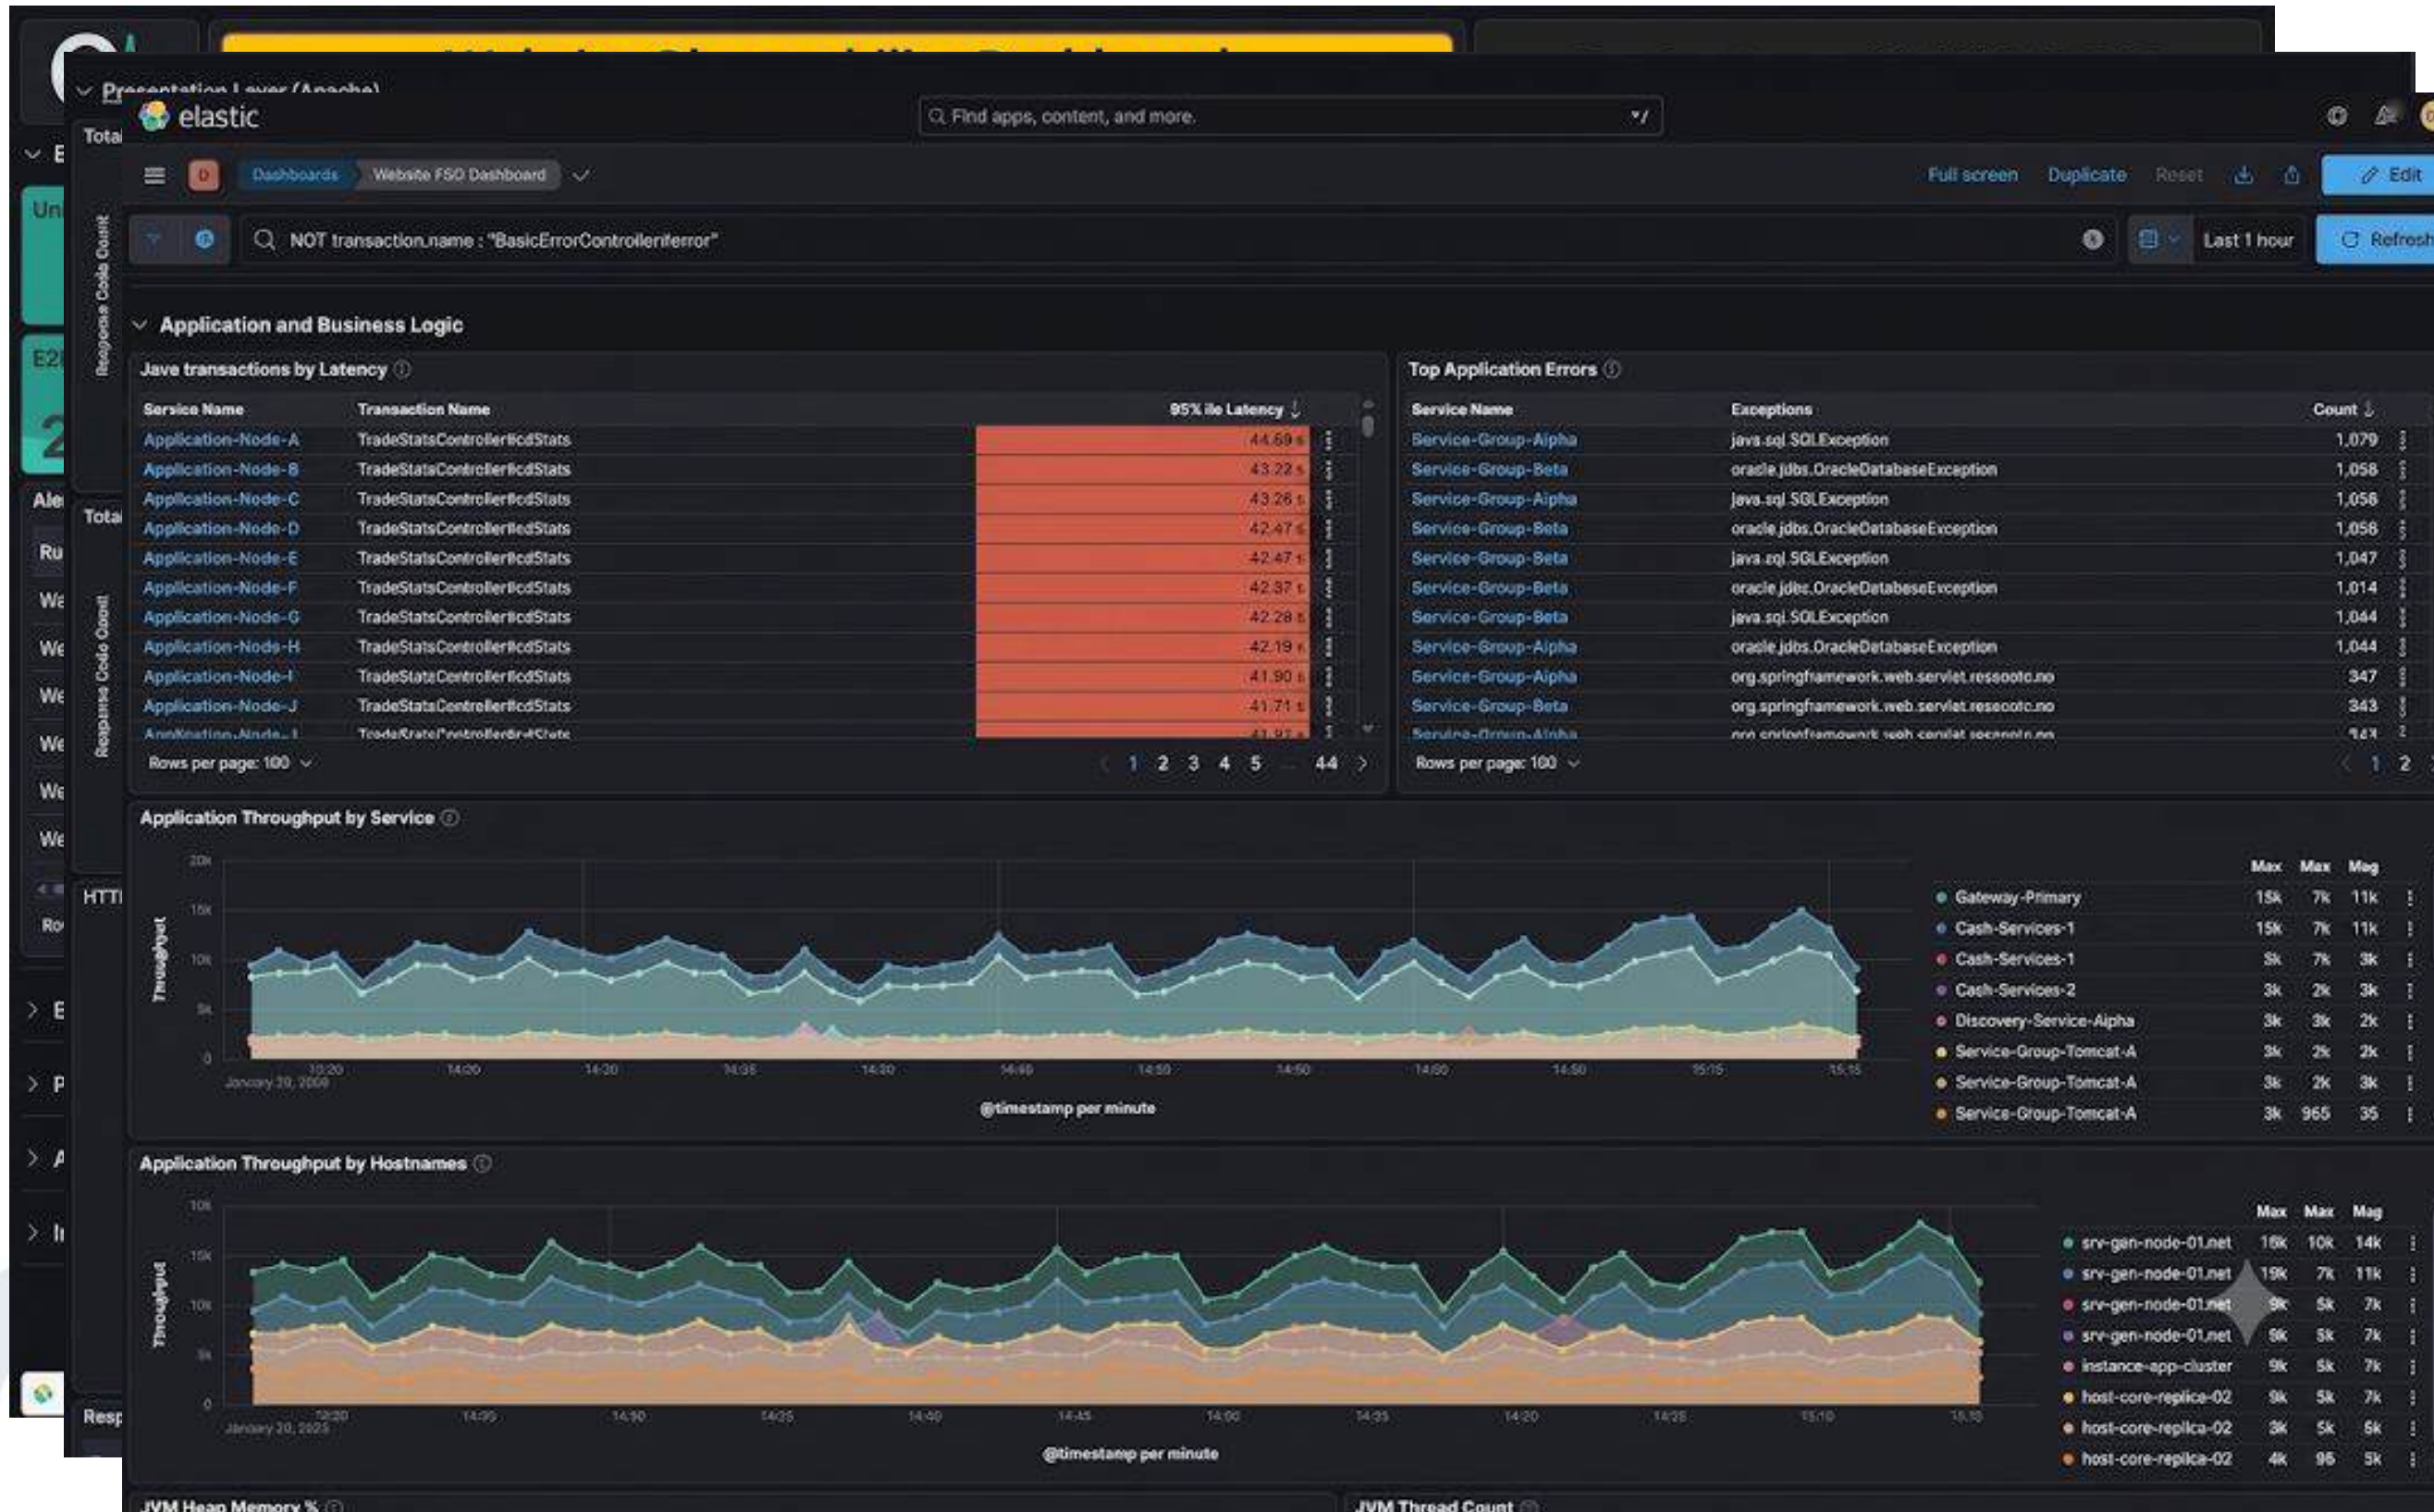

PTP Monitoring
